## End Semester Examination - June 2021

### EXAM TYPES AND GRADING METHOD

Plagiarism and collusion are considered as serious offences and special measures will be taken to detect those. If plagiarism, collusion, or any other academic misconduct is detected in an online exam, strict punitive actions will be taken.

- **Exam types** - The Faculty of Computing has defined two exam types (Type 1 and Type 2) as indicated in the timetable below.
  - a. Type 1 - These exams are conducted on the Respondus Locked Down browser.
  - b. Type 2 - These exams have two sections. The section 1 will be conducted on the Locked Down browser. Section 2 will be conducted without the locked down feature. Therefore, there will be two exam links for the two sections. You must finish the section 1, submit it, and then do the section 2.
  - c. For all Year 3 and Year 4 modules, when the Respondus Locked browser is used as above, the online monitoring environment too will be used. Therefore, student will need a working camera and sound in the computer. For Year 1 and Year 2 modules, the monitoring environment will not be used.

□ **Grading method** - Students will get letter grades (C, B, A, etc.) for this exam. Grades will be calculated entirely from the online exam. However, under the following circumstances to maintain the accuracy of grading, VIVA will be held at the discretion of the lecturer-in-charge before finalizing the grade irrespective of the year of study.

- a. If a complaint is received regarding an exam offense
- b. If any suspicious behavior is detected during an online exam
- c. If any unusual behavior is detected in the answer script

□ The above information is applicable only to modules with final exams. Modules without final exams such as project modules will be assessed using usual methods, such as online presentations, and letter grades will be awarded,
